OEM Licenses allows you to distribute Highcharts in your software or hardware product

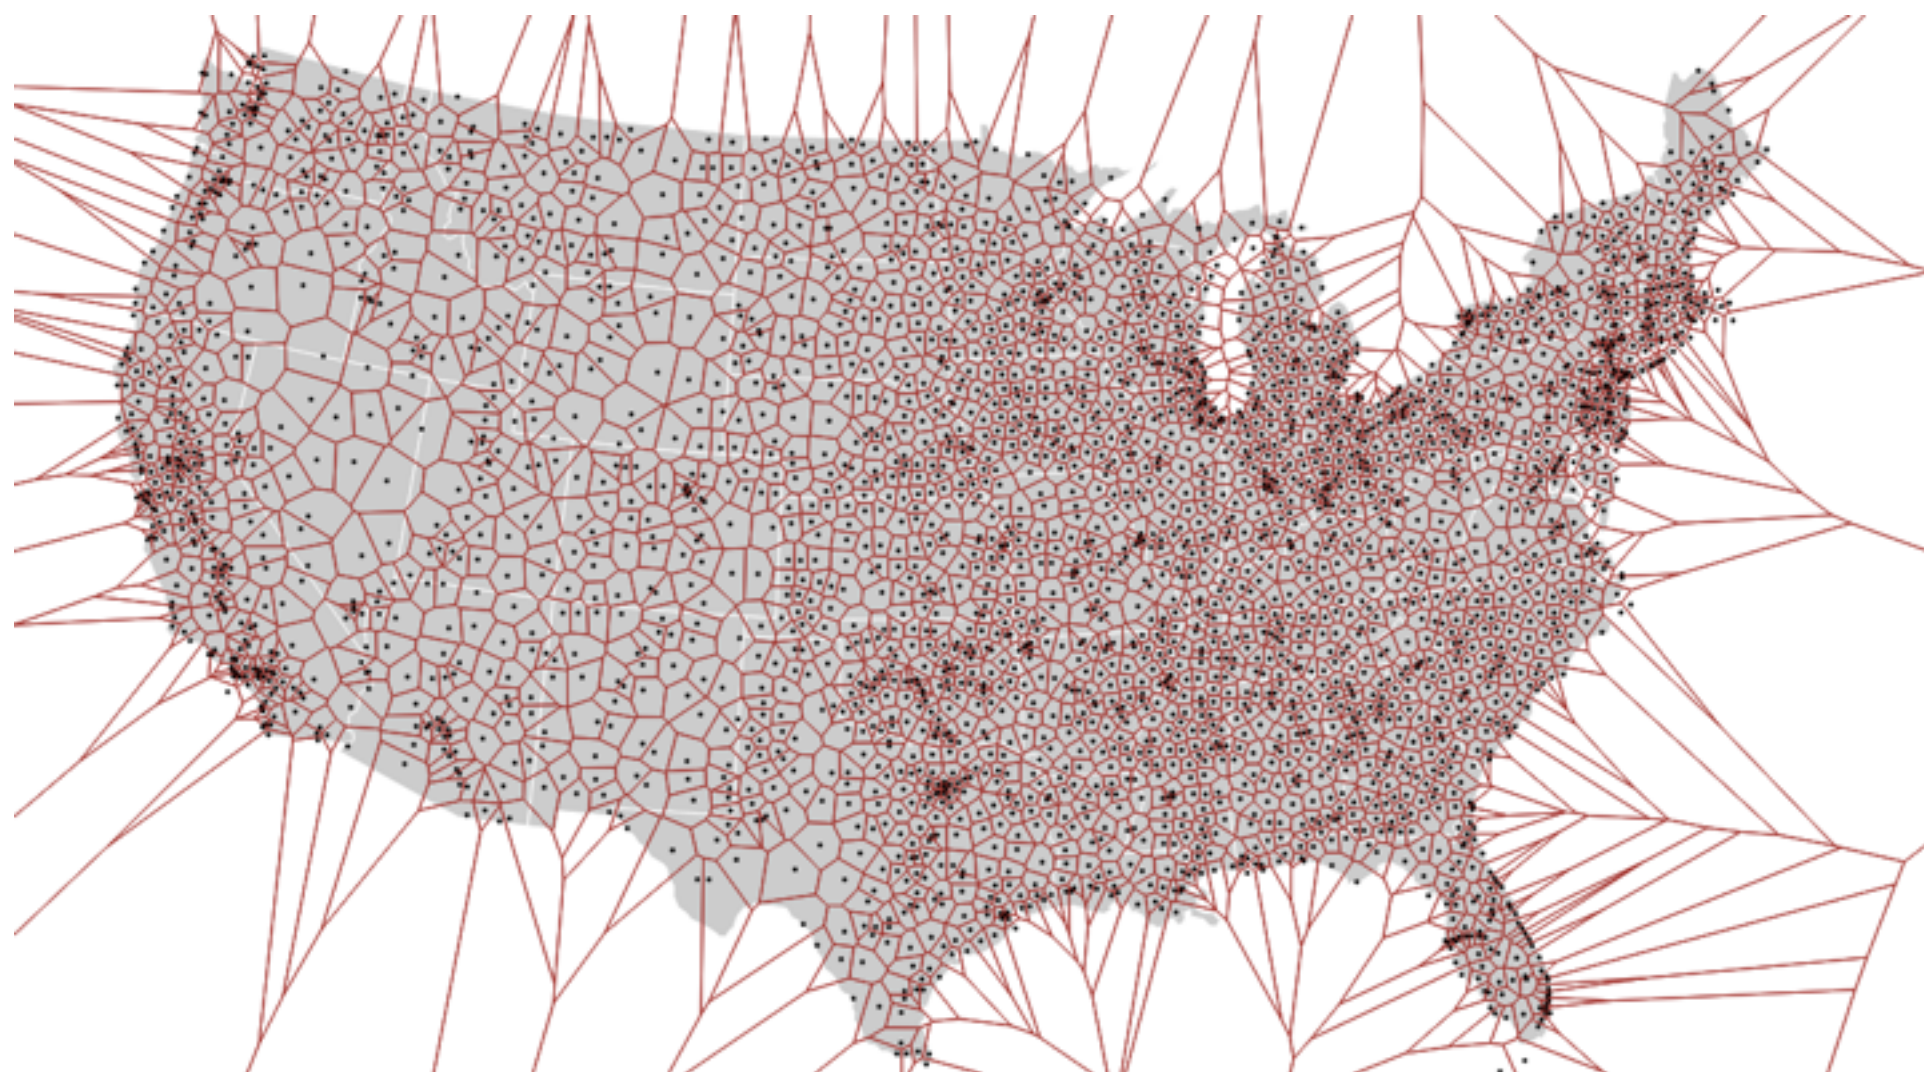

D3.js

a large open-source framework for data visualisation

D3 is more of a data visualisation library. You can create a simple bar chart to some complex animated data visualisations using D3. And all this without too much effort from your side. D3 provides you a lot of layouts. You don't have to start from scratch, you can start building on these layouts

D3.js examples

GraphUp jQuery Plugin

“GraphUp is a very flexible and lightweight jQuery (v1.4+) plugin to spice up your data tables. It visualizes the values using color, bar charts and bubbles.”

Many options — Pick a data cleaner and a painter: fill, bars, bubbles; configurable decimal point (dot or comma); customizable color maps and CSS classes

Lightweight — The plugin takes only 4kB to load.

Extensible — Easily create your own cleaners, painters or color maps. Also, a callback is available to perform any operations on a cell before painting.

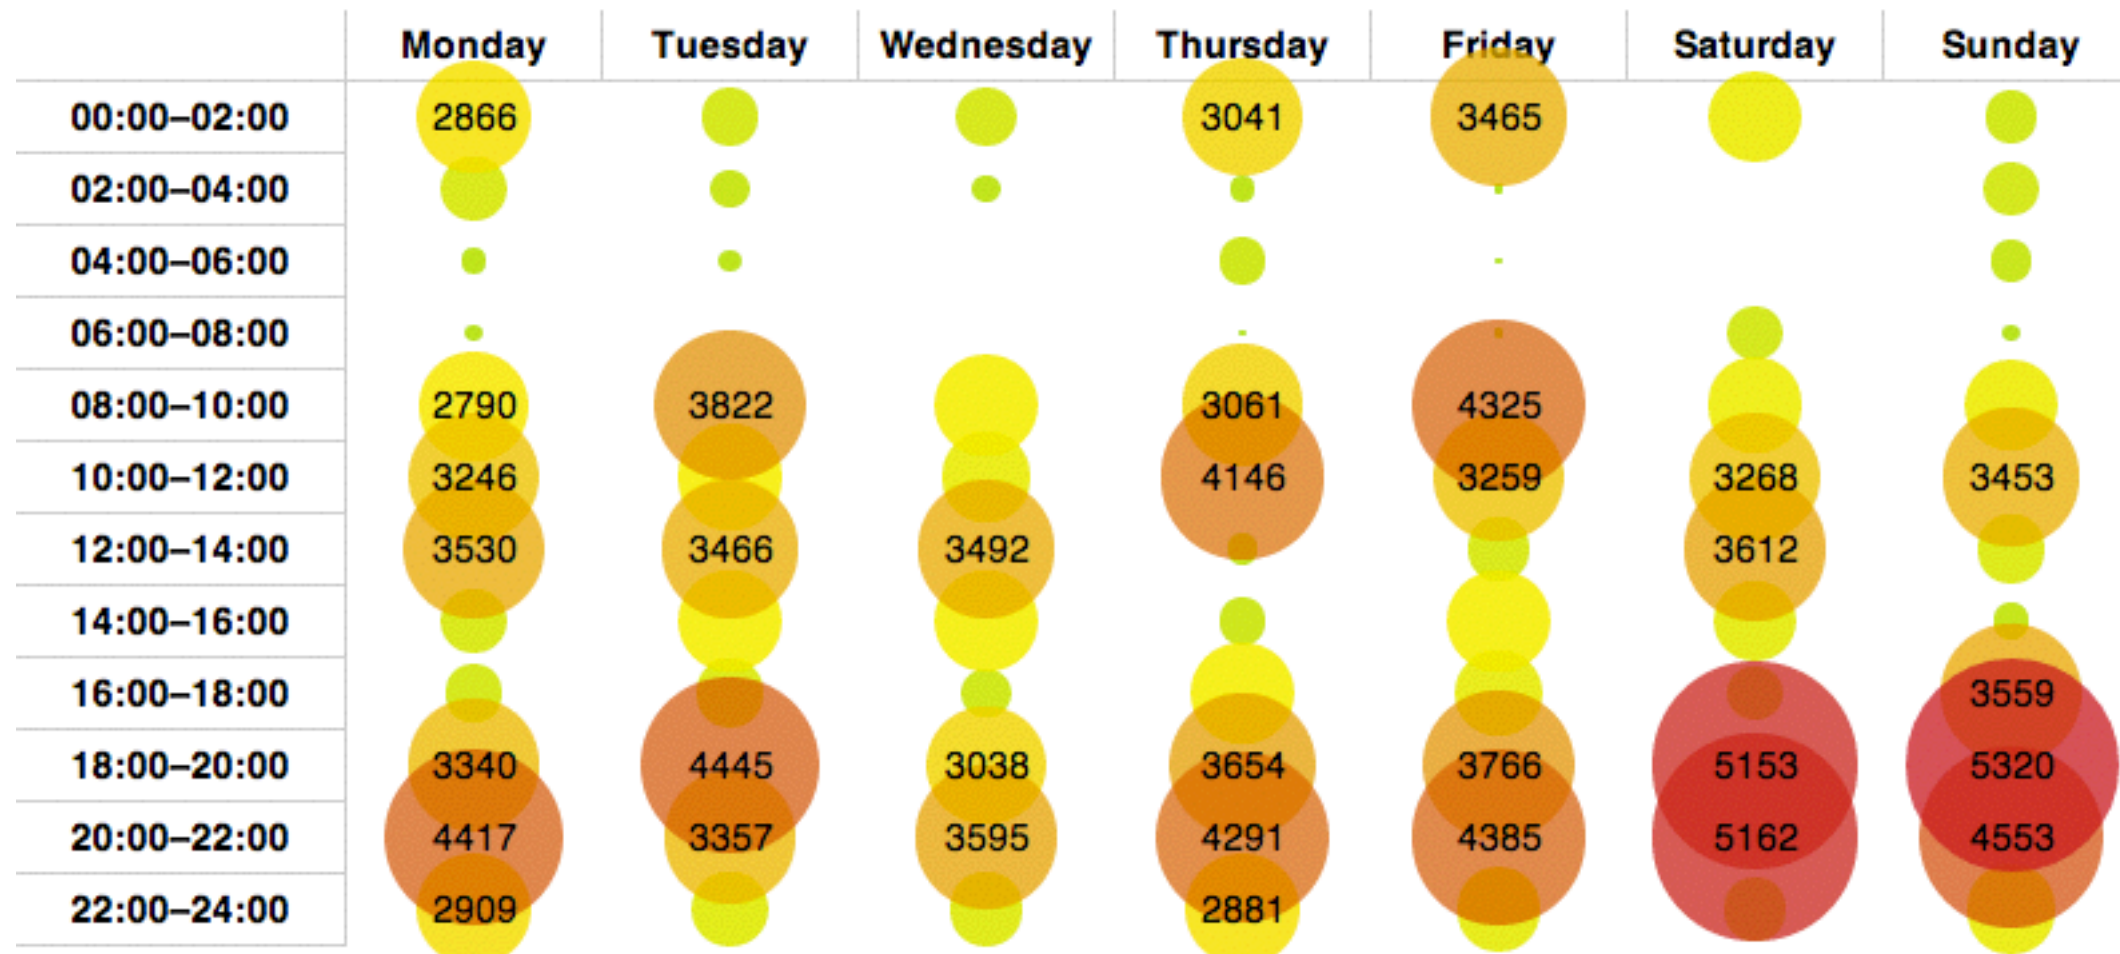

License: Regular License costs \$15. Extended License costs \$75

Compatible Browsers: Chrome 5, FireFox 2, FireFox 3, IE7, IE8, Opera, Safari

jQuery Visualize Plugin

jQuery Visualize Plugin is the perfect plugin if you have a table and want to generate a chart out of it. It offers different types of charts such as Bar, Area, Pie & Line charts.

Type of Charts: Bar, Area, Pie & Line.

Requirements: jQuery, excanvas (included)

Browser Support: IE6*, IE7*, IE8*, Firefox 2, Firefox 3.5, Safari 3 and 4, Opera 9.

* HTML 5 canvas element is not supported by IE but Google maintains a library that translates canvas scripting into VML, allowing it to work in all versions of internet explorer.
